

E-Cell of BCREC

Entrepreneurship Cell is a non-profit student group dedicated to instilling the entrepreneurial spirit in students. E-Cell's main goal is to encourage today's college students to create their own business. Hundreds of colleges, both rural and urban, have built e-cells.

EDC's mission is to not only raise awareness about entrepreneurship among students through workshops, speaker sessions, and other events, but also to encourage aspiring entrepreneurs by providing them with resources such as mentors, consulting, seed funding, and networking.

The E-cell of Dr. B. C. Roy Engineering College , Durgapur had started in the year of 2014 with an objective to promote entrepreneurial acumen among students. The cell collaborated with National Entrepreneurship Network under Wadhvani Foundation to deliver “entrepreneurial skill development” courses. In 2018, the College signed an MOU with Wadhvani Foundation for their support in developing the entrepreneurial ecosystem. Faculties have been trained by NEN for delivering such courses. Some students had started their own ventures after completion of their degree. In last few years our cell has invited working entrepreneur from time to time to share their experience with our students and inculcate an entrepreneurial spirit in them. Online entrepreneurship courses are conducted by the E-Cell, supported by in-house faculty members certified by Wadhvani Foundation, under Wadhvani Global University.
