### Online Education

| | |
|---|---|
| 1. Does all programs/courses were completed on time. | Yes |

| | |
|---|---|
| 2. Measures taken to complete the syllabus of courses and programs. | Measures taken for completion of the syllabus of course and program (online)<br>During the pandemic situation, college authority decided to conduct online classes for each course of all programs for completion of syllabus. Accordingly, a special routine was framed for commencement of online classes and circulated to the students and faculty members.<br>Faculty members delivered lectures through different online platforms such as Google meet, zoom, etc. Students could interact online with faculty members during these classes. Students were also provided soft copies of reading materials and links of different online lectures for further reading and reference. Regular formative assessment was conducted through assignments, quiz and asking questions during online lectures.<br>Completion of the syllabus of practical papers requiring laboratory exposure was a challenge in the online mode. To ensure the distant mode learning of these papers, faculty members took the initiative to perform the experiments of each course in the college laboratories strictly following the COVID-19 government guidelines. Students were then provided the videos of these experimental demonstrations along with the detailed procedure, methodology and precaution measures to be followed for the experiments. This has helped the students to experience the practical learning through visualization when they are not physically present in the laboratories.<br>Some of the videos and class notes have been uploaded in a separate server (https://srv15-bcrec.in/repo/) for students so that they can easily access these online study materials and learn at their own pace and time beyond the college hours presently and also in future. This initiative has introduced the e-learning methodology in the college.<br>For practical papers requiring computer simulations, the downloading and utilization of different open source software was demonstrated by faculty members in their online lectures so that students can download and perform software based applications. This has helped the students to design and develop computational skills. Problems faced during these computation simulations were addressed by faculty members during online interactions with the students.<br>Group discussions prescribed in the syllabus were conducted through online mode. This has helped students to prepare for online interviews conducted by companies during the pandemic situation.<br>Online personal interviews with students were also conducted to evaluate and solve the problems during the learning process, interviews and other related issues.<br>The above mentioned measures were found to be quite effective and resulted in the successful completion of syllabus within the stipulated time frame of the semester. During the pandemic situation, the university end semester examinations were delayed by three months (approximately). Consequently, after syllabus completion, faculty members got some extra time to teach the advanced aspects of the syllabus topics. Faculty members used student friendly approaches and trained students to adopt problem solving methodologies for competitive examinations such as GATE, IES etc.<br>During the pandemic situation, the overall online teaching-learning process of the college was monitored by a committee consisting of the Principal/Director, Registrar and the heads of different departments to ensure effective implementation. |
