

About Science & Technology

Science is the study of the natural world by collecting data through a systematic process called the scientific method. And technology is where we apply science to create devices that can solve problems and do tasks. Technology is literally the application of science

About National Science Day

National Science Day is celebrated in India on February 28 each year to mark the discovery of the Raman effect by Indian physicist Sir C. V. Raman on 28 February 1928. For his discovery, Sir C.V. Raman was awarded the Nobel Prize in Physics in 1930.

ACTIVITIES

Posters and Scientific Models presented by students will be assessed and prize will be awarded based on merit

BASIC SCIENCE & HUMANITIES

"Science clears the field on which Technology can build". A famous quote from Heisenberg, a renowned scientist. A strong basic background of mathematics, physical sciences and presentable communication skill is essential to become a good Engineer. A dedicated team of excellent faculty members from esteemed Institutions like IIT, BESU and Jadavpur University has made the foundation of our Department, Basic Science and Humanities, very strong. A good mutual understanding among the faculty members with ample support from the administration/Management is our strength. We are the first step that every learner takes as soon as they enter, the college irrespective of their programs of study. On behalf of BSH Dept, we stand committed to BCREC's pursuit of excellence.

An interactive program on the latest trends in the field of science

We aim to inspire the community to participate and learn from the rich field of science.
