Overview of Mentoring:

Mentoring is a dynamic and interpersonal relationship between an experienced and knowledgeable individual (mentor) and a less experienced or knowledgeable individual (mentee). This relationship is characterized by guidance, support, and knowledge transfer with the aim of personal and professional development. The mentoring relationship is built on mutual trust, respect, and communication, and involves both parties meeting regularly to exchange ideas, discuss progress and set goals for further development. A mentor does not need to know, or to provide, all the answers; instead, the mentor encourages the mentee to use her/his available resources to identify solutions. Mentoring occurs across various contexts, including education, career development, and personal growth.
