

Dr. B. C. Roy Engineering College, Durgapur

Department of Computer Science & Engineering

Ref: BCREC/CSE /DAC/2022-23/Even/004

Date: 18/05/2023

A Special DAC meeting took place on 18th May 2023 at 3:00 PM in the Meeting Room to discuss in detail and finalize the Action Taken Report based upon Feedback on Academics and Feedback on facilities for the odd semester Academic Year 2022-23. The feedback was submitted in the college website online by students of the Computer Science and Engineering Department. Following are the major points of the Action Taken Report:

Meeting Agendas:

1. Feedback Analysis & Action Taken
2. Program outcome and curricular gap identification

Minutes:

- Action Taken Report based upon Feedback on Academics for the odd semester 2022-23 AY.

Feedback on gaining new scientific or technical knowledge shows good adaptation in the teaching and learning process. Students were able to use their knowledge and talents to solve issues pertaining to their area of study. The effective and engaging lessons were much appreciated by the students. Students have acknowledged that the specified curriculum and laboratory experiences are relevant to the needs of the present economy and that the lab is equipped with the necessary modern instruments and facilities. The procedures for student mentoring and counseling received favorable feedback. Students' general communication abilities also got better.

1. The department has decided to provide all students with add-on certificate courses, along with other programs, which will help close the gap between industry demands and academic standards.
2. It has been agreed to encourage more students to take part in tech fests, hackathons, and coding competitions held by various institutions and organizations.
3. The job counseling center offers spoken English classes, group discussion sessions, and body language training for its clients. Senior students receive appropriate guidance and training to help them get ready for internship possibilities and competitive exams like GATE, CAT, GRE, IES, etc.
4. Students have actively taken part in numerous sports, NCC, NSS, and social events held for their all-around growth.
5. The institution's workshops, seminars, and webinars designed to bridge the gap between

industry and academia received positive feedback from student involvement. Additionally, it has been agreed to regularly conduct site visits and industrial visits to pique students' interest in the practical application of domain knowledge.

6. Students have also decided to hold seminars, workshops, tech quizzes, poster competitions, etc., through professional clubs/chapters. This will encourage them to collaborate with one another and come up with fresh, creative ideas to make the events engaging and successful.
7. To better grasp the needs of the industry and to get ready to advance their knowledge and skills so that they can fit into society after graduation, senior students are encouraged to complete internships at reputable organizations.

• **Action Taken Report based upon Feedback on Facilities for the odd semester, 2022-23 AY**

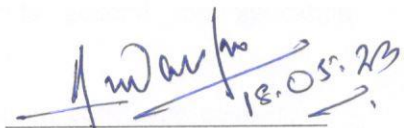

The majority of students expressed great satisfaction with the different facilities, including the lab, library, hostel (if appropriate), and sports facilities. Water, sanitation, and hygiene facilities. Student recommendations:

1. While the majority of students expressed satisfaction, a small minority of students (7.9%) believed that the canteen facilities could use some improvement.
2. A small number of first-year students—more specifically, 2.30%—had some problems with the hostel amenities. The Action Taken Report's main points are as follows: The students were given the assurance that any complaints (if any) with the dorm and canteen amenities will be brought up at the proper forum and addressed as soon as feasible.
