Seminar Request_Globsyn 2018

Amrita Saha **<amrita.saha@globsyn.edu.in>**   Apr 10 (8 days ago)

Respected Sir,

Greetings from Globsyn Group !!!

As per your discussion with my colleague Mr. Soumojit Paul I am sending you a brief details of Globsyn Summer School 2018 .

As discussed over the meeting we are going to conduct the seminar on 25th April,2018. On that day Globsyn officials along with the Technical team is going to address 2nd Year and 3rd year students of your college in that seminar.

At the outset, I would like to introduce Globsyn Group, a conglomerate of companies with business interests in Technology, Knowledge & Skills. Established in the year 1997, the association with 200+ Engineering Colleges from 21 states of this country has aided Globsyn Finishing School in becoming the largest engineering training institute in eastern India. For details please visit website: www.globsyn.com

You must be aware that in the present day, due to the proliferation of modern technologies, cheap computation power, easy availability of sensors, smart phones and internet; huge amount of information is being generated. For companies to compute this humongous amount of data there has now been a soaring demand for jobs in high-end technical areas like Big Data, Artificial Intelligence, Internet of Things, Machine Learning, Android App Development etc.

In our continuous quest for creating meaningful training modules for the students, we, at Globsyn, have upgraded our courses in collaboration with the best IT practitioners of the country. Therefore, the kinds of technology-based Projects selected in our Summer Training for engineering students (that will commence in Summer-2018), are offered keeping in mind the demands of the radically changing IT industry. For details please visit website: www.globsynfinishingschool.com

We would also like to take this opportunity to introduce our latest offering in the domain of innovative entrepreneurship - the **Startup Café**! This is a youth mobilization platform and think tank on artificial intelligence. A venture of Bikram Dasgupta (Founder - Globsyn Group and Former Director - PCL), Startup Café incubates, mentors and invests in startups working in the areas of artificial intelligence, machine learning, data analytics and internet of things.

So, for individuals who have an innovative, technology driven mind with a concept or product/service to offer and is looking for investors, our Startup Cafe will help take their innovation to the next level by nurturing, mentoring and promoting young entrepreneurs to launch their own innovative start-up companies.

Key Highlights

Training on Real Life Projects

Training by experienced professionals

Training based on SDLC implementation

Industry and Development Oriented Training

[handwritten notes:] This seminar is very essential for the students. We want to organise it in vacant periods only on 25/4/18

CKoner 19/9/18.

May be permitted in the vacant slot.

NO. 19/4/2019

Seminar on "Real life Projects"
