
# CURRICULUM ESSENTIALS

## Department of Applied Electronics & Instrumentation Engineering

**Dr. B. C. Roy Engineering College, Durgapur – 713206**

**(OLD SYLLABUS)**

**Affiliated to MAKAUT and approved by AICTE**

**Department of Applied Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**

## VISION OF THE DEPARTMENT

*To aspire to be a premiere department; imparting world class technical education and to bridge industry expertise with academic excellence, thereby producing technically competent engineers catering to the needs of the society, environment and the nation.*

## MISSION OF THE DEPARTMENT

*The mission of the Applied Electronics and Instrumentation Engineering Department is to provide*

- *foundation in Electronics and Instrumentation, and the underlying mathematics and science*
- *excellent opportunity with strong moral sense of social and ethical responsibilities to promote high standards of professional ethics and accountability*
- *state of the art infrastructure and a facilitating environment to impart quality education*
- *conducive environment for creating networks with alumni, industries, educational institutes and other stake-holders and encourages collaborative research*

*in order to build up professionally competent engineers through value-added teaching, learning and research environment.*

**Department of Applied Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**

## PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

1. Graduates of Applied Electronics and Instrumentation Engineering department are expected to excel in professional career or pursue higher education and research or in entrepreneurship by acquiring sound knowledge in basic science, mathematics and core engineering.

2. Graduates of Applied Electronics and Instrumentation Engineering department are expected to abide by professional code of conduct, following the principles of financial management, possessing sound communication skills and ready to take leadership or have enough tolerance to act as a simple and indispensable member of a multicultural team working on a multi-disciplinary project.

3. Graduates of Applied Electronics and Instrumentation Engineering department are expected to be a good citizen, conscious about the society and environment, respect for professional ethics and values and quality to adapt in the fast changing society through life-long learning.

**Department of Applied Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**

# PROGRAM OUTCOMES (POs)

On completion of the program, the students will be able to:

**PO1 Basic Science and Engineering Knowledge:** Apply the knowledge of science and mathematics to learn basic science and engineering science courses and thus enables the students to apply them in learning the Professional core course .i.e. Applied Electronics and Instrumentation Engineering.

**PO2 Computation Skills:** Acquire analytical thinking, problem solving abilities, review research literature, implement modern computational procedures and analyze complex engineering problems to apply on core electronics and instrumentation field.

**PO3 Design and development of Solution:** Apply core electronics and instrumentation engineering knowledge to design Electronic circuits, highly sensitive sensor networks for monitoring and control of various physical, chemical, pharmaceutical and Industrial parameters and processes.

**PO4 Complex Problem Investigation:** Apply core instrumentation knowledge to improve working of existing transducers, sensors, telemetry and remote control devices, and derive solutions to interface with dedicated microcontrollers and high end computers and able to measure and control any industrial processes efficiently.

**PO5 Modern Tools Utilization:** Apply expertise in the utilization of modern software tools like C, JAVA, TASM, MATLAB/Scilab, PLC programming software, and DCS software, and, modern hardware gadgets like the Digital Storage Oscilloscopes, Function Generators, Spectrum Analyzers, stroboscope, LVDT, PID Controllers, PLC, DCS, and flow, level, pressure, and temperature transmitters.

**PO6 Engineers for Society:** The students of engineering should be motivated to utilize their Scientific, Technological, Computational and Instrumentation skills for the better addressing the societal needs. Design new sophisticated instruments for the high-end Research and Process Industries, Pharmaceutical, Bio-medical fields. They should utilize their expertise to develop indigenous technologies, instruments, gadgets, and inexpensive healthcare systems affordable by common people.

**PO7 Environment and sustainability**: Utilize their knowledge to design low power consuming, highly sensitive, low radiating ecofriendly devices compatible with modern interfacing techniques in conformity with the specific standards and norms.

**PO8 Ethics**: The students are motivated to follow a code of ethics and moral perspectives at the individual level as well as at the professional level to protect the interests of all the stakeholders, with a concern for societal responsibilities.

**PO9 Individual and team work**: Communication skills, Aptitude development programs, Team activities like NSS, project, Seminar Presentations etc. contribute greatly for the development of individual talents/skills. Involvement in Cultural fest, Technical fest, Sports activities provided in the

institute shall also develop capabilities of a student to mold oneself as an Individual member, Team leader or an Organizer.

**PO10 Communication Skills:** Utilize basic humanities courses and shall acquire excellent communication skills both orally as well as in writing. They shall be able to transform their innovative ideas into excellent technical reports for presentation/publication in seminars/journals.

**PO11 Project Management and Finance:** Extend their management concepts for drafting of proposals for projects with thorough understanding of the procurement plans (materials, software, and hardware), project management and financial allocations and management during the execution of the project.

**PO12 Life-Long learning:** Engage their abilities to learn and implement technological changes through life-long learning and also contribute their expertise for the benefit of the current stake holders and the society.

## PROGRAM SPECIFIC OUTCOMES (PSOs)

The students of Applied Electronics and Instrumentation Engineering (AEIE) will be able to:

**PSO1:** Apply the fundamentals of electrical, electronic, computer, mathematics, science and engineering knowledge to identify, design, develop and investigate complex problems of electrical and electronic circuits, electronic process instrumentation, measurement and process control field.

**PSO2:** Apply appropriate technique and modern engineering hardware and software tools to design, develop, measure and control the electronic and instrumentation system to engage in life-long learning and work efficiently as an individual and in a multidisciplinary team.

**PSO3:** Understand the impact of professional behavior and ethics and effective communication with engineering community and the society.

**Department of Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**
**Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering, Applicable from Academic Session 2010-11 unto 2017-18**

**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**
**Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering**
**Applicable from Academic Session 2012-13 unto 2019-20**

| | |
|---|---|
| **Department** | AEIE |
| **Course Code** | EI 591 |
| **Title of Course** | Industrial Instrumentation Lab |
| **Nature of Course** | Compulsory |
| **Type of Course** | Practical |
| **Contact Hours** | L-T-P:0-0-3 |
| **Total Contact Hours** | 40 |
| **Course Outcomes** | **CO1:** Determine, compare and contrast the merits/demerits of instruments/transducers used to measure process parameters such as temperature, flow, level, moisture, viscosity.<br>**CO2:** Employ standard techniques for calibrating measuring instruments. |

| | |
|---|---|
| **Department** | AEIE |
| **Course Code** | EI 592 |
| **Title of Course** | Sensors & Transducers Lab |
| **Nature of Course** | Compulsory |
| **Type of Course** | Practical |
| **Contact Hours** | L-T-P:0-0-3 |
| **Total Contact Hours** | 24 |
| **Course Outcomes** | **CO1:** Employ various types of sensors and transducers to measure the physical parameters: temperature, displacement, speed, pressure, torque, weight.<br>**CO2:** Analyze the characteristics of an optical sensor (e.g. LDR). |

**Department of Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**
**Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering**
**Applicable from Academic Session 2012-13 unto 2019-20**

## Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering

**Applicable from Academic Session 2012-13 unto 2019-20**

| | |
|---|---|
| **Department** | CSE |
| **Course Code** | EI 594B |
| **Title of Course** | Data Base Management System Lab |
| **Nature of Course** | **Elective -2B Lab**<br>Session 2015-16 No. of Students Opted: 57<br>Session 2016-17 No. of Students Opted: 18<br>Session 2017-18 No. of Students Opted: 38<br>Session 2018-19 No. of Students Opted: 39<br>Session 2019-20 No. of Students Opted: 18 |
| **Type of Course** | Lecture |
| **Contact Hours** | L-T-P:0-0-3 |
| **Total Contact Hours** | 30 |
| **Course Outcomes** | **CO1:** To create database, perform basic operation like insertion, deletion, and updation.<br>**CO2:** To retrieve data from the database through query languages like SQL.<br>**CO3:** To configure a database at the background of a high level program using front end tools and forms. |

**Department of Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**
**Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering**
**Applicable from Academic Session 2012-13 unto 2019-20**

| | |
|---|---|
| **Department** | IT |
| **Course Code** | EI 594C |
| **Title of Course** | Software Engineering Lab |
| **Nature of Course** | **Elective -2C Lab**<br>Session 2015-16 No. of Students Opted: 0<br>Session 2016-17 No. of Students Opted: 0<br>Session 2017-18 No. of Students Opted: 0<br>Session 2018-19 No. of Students Opted: 0<br>Session 2019-20 No. of Students Opted: 0 |
| **Type of Course** | Lecture |
| **Contact Hours** | L-T-P:0-0-3 |
| **Total Contact Hours** | 30 |
| **Course Outcomes** | **CO1:** Define Software Engineering and explain in detail and thereafter state the necessity/importance of the fundamental concepts of SDLC, COCOMO Model, Context diagram, DFD, System design, Decision tree, Decision table ,coding & documentation, Structured and Object Oriented programming, Testing ,validation and verification metrics ,software project management and object oriented design in UML.<br>**CO2:** Directly apply the fundamental concepts of Software Engineering to solve (implement) the most elementary/simplest model problems, and thereafter Design & develop the software projects .Directly combine the fundamental concepts to solve (design and implement) elementary model problems on the idealistic components of real-world systems using Software Engineering.<br>**CO3:** Analyze and Identify requirements and prepare models using different SDLC. Compute the output of given model subsystems (and also identify errors in the design and implementation of given model subsystems using the concept of Software Engineering for an organization/institute.<br>**CO4:** Compare and contrast in details between the fundamental concepts of Software Engineering and thereafter describe an overview level interconnected map of concepts/terminologies of Software Engineering.<br>**CO5:** Identify risks, manage the change to assure quality in software projects and explain where and how the Models are utilized in large scale real world systems, and thereafter Design the schematics for typical components of large scale known real world systems using the concept of Software Engineering.<br>**CO6:** Identify unsolved but necessary real world problems of Software Engineering and thereafter demonstrate and evaluate real time projects with respect to software engineering principles. |

| **Course Outcomes** | **CO1:** Develop the concepts of different types of power plants and their associated instrumentation.<br>**CO2:** Know the different control loops, safety interlocking and alarm management systems of Boiler.<br>**CO3:** Design power plant layout and analyze process data. |

**Department of Electronics & Instrumentation Engineering**
**Dr. B. C. Roy Engineering College, Durgapur – 713206**
**Affiliated to MAKAUT and approved by AICTE**
**Documentation of Course Outcome (CO) of Applied Electronics & Instrumentation Engineering**
**Applicable from Academic Session 2013-14 unto 2020-21**

| | |
|---|---|
| **Department** | ECE |
| **Course Code** | EI 802A(EC) |
| **Title of Course** | Mobile Communication |
| **Nature of Course** | **Elective -2A**<br>Session 2015-16 No. of Students Opted: 0<br>Session 2016-17 No. of Students Opted: 57<br>Session 2017-18 No. of Students Opted: 10<br>Session 2018-19 No. of Students Opted: 0<br>Session 2019-20 No. of Students Opted: 0 |
| **Type of Course** | Lecture |
| **Contact Hours** | L-T-P:3-0-0 |
| **Total Contact Hours** | 46 |
| **Course Outcomes** | **CO1:** Know the infrastructure to develop cellular radio concepts such as frequency reuse, hands off and ad-hoc networks.<br>**CO2:** Develop the concept of coding, channel models, diversity, equalization and channel estimation techniques in presence of fading environment.<br>**CO3:** Design analytical and empirical models using wireless links using license-free band (wireless PAN, Bluetooth, Wi-Fi etc.)<br>**CO4:** Describe current and emerging cellular communication systems (GSM, IS-95, WCDMA/3G) |
